

## Thank you for entrusting your care to us!

We take this trust very seriously and have invested in the **SterilWize™** Sterilization system to ensure that your care meets or exceeds Ministry of Health and Dental Regulatory Standards

The SterilWize™ system ensures that every instrument that is involved in delivering your care has passed a rigorous set of criteria and tests before they are utilized.

The SterilWize System monitors, records and ensures:

- That all necessary processes were performed by our staff members
- That each of our Sterilizers passed their daily tests
- That each sterilization cycle achieved the required temperature and pressure parameters
- That a staff member validates that all of the indicators (used to monitor and validate all aspects of sterilization) have passed the tests
- That every set of our instruments are sealed, barcoded and tracked thought-out the sterilization process to ensure that all standards are met.
- That all the above is certified before the instruments are signed out to be used for your treatment.

If you would like to find out more about our SterilWize™ system, please request a tour and explanation from one of our team members.

**In short, you are very important to us and we go to tremendous efforts to ensure that you always have **Peace of Mind!****
